OTHER APPROVAL REQUIREMENTS FOR HUMAN SUBJECTS RESEARCH

The University of Iowa IRB interacts with other committees in the Human Research Protection Program (HRPP) and other offices or entities that review research projects involving human subjects research. Many of them review information included in the HawkIRB application and attached documents. Others have a separate application form or process. **Use the dark boxes** in this chart to determine if you need approval from a particular committee, office or entity. **Click “Learn More”** to go to their web page. For projects overseen by an external IRB, all approvals must be obtained from these other committees/entities prior to submission to the external IRB. Here is a key to the color coding:

Approve application <u>before</u> IRB review	Accounting Services, CIRC, PRMC, RBC
Review application <u>concurrent</u> with IRB review. Finalize <u>before</u> IRB approval.	CT.gov, MRPC, NRC, P&T
Concurrent with IRB review. Finalize <u>before</u> IRB releases application.	DSP, P&T IDS, IBC
Review project <u>separately</u> from IRB review and approval process	CRU, Pathology
Review application <u>after</u> IRB approval	VAHCS
